Ever Active Schools Overview

Ever Active Schools is an established cross-ministerial provincial initiative designed to help create and sustain active, healthy school communities.

Ever Active Schools supports quality wellness education through a comprehensive school health approach and works to ensure schools have the resources they need to respond to the complexity of Alberta's classrooms.

Ever Active Schools implements five core strategies to advance the health and learning outcomes of Alberta students.

VISION

All Alberta students belong to healthy school communities that enable optimal health and learning.

MISSION

To provide provincial leadership that promotes and supports healthy, active school communities through a comprehensive school health approach.

PRIORITY

Lead, support and connect work towards improved health and learning outcomes of children in Alberta.

Ever Active Schools' Five Core Strategies

Collaborative Partnerships ///

Ever Active Schools facilitates collaborative partnerships within and across health, education, recreation and active living sectors through direct relationships with school communities and school jurisdictions, participation on local, regional and provincial interagency committees and hosting opportunities that bring together professionals from different sectors.

Support Wellness Education and Comprehensive School Health ///

Ever Active Schools supports the development and delivery of wellness-related curricula through high quality resources that promote interdisciplinary competency-focused approaches and increase the number of schools in Alberta that assess, prioritize and action plan as part of a comprehensive school health approach with online and in-person support.

Communication and Knowledge Exchange ///

Ever Active Schools acts as a conduit for communication and knowledge exchange for school health through the website, newsletters, social media, *Healthy Schools Alberta* and work with post-secondary institutions. Ever Active Schools is a platform to promote wellness resources by providing ongoing support and informing schools of evidence-based best practices.

Capacity Building Through Innovative Projects ///

Innovative projects empower local communities to build capacity to support wellness initiatives both in and out of school hours and use evaluation to determine best practices that can be scaled up and shared across the province.

Competency Focused Learning Opportunities ///

Ever Active Schools provides competency-focused, interdisciplinary learning opportunities for school communities through professional learning opportunities, the annual school health Shaping the Future conference, the Physical Literacy Summit and the Summer Institute. Ever Active Schools also hosts the province-wide Healthy Active School Symposia events, which focus on building competencies to support students to become engaged thinkers and ethical citizens with an entrepreneurial spirit.

High school students at Grande Prairie Healthy Active School Symposium, working on a group activity.

2014-15 Year in Review

In 2014-15, Ever Active Schools continued to assist schools in creating and sustaining healthy active school communities.

By fostering a comprehensive school health approach, Ever Active Schools contributed to provincial efforts to support the healthy development of children and youth in Alberta.

Working through our five core strategies, Ever Active Schools saw growth in nearly every area, resulting in expanded support to 47% of Alberta school communities and communications and resources to all 61 school jurisdictions.

Ever Active Schools remained a reliable and responsive delivery arm for school wellness in Alberta amid a changing political landscape. This meant providing school communities with the knowledge, resources and skills needed for interdisciplinary, competency-focused solutions for healthy schools. Ever Active Schools was successful in coordinating action from many partners and from diverse sectors within this context, while honouring the priorities of each sector. The results of this work showed improvements in students' knowledge and behaviours towards health and wellness.

2014-15 Key Activities and Results

Intended Outcomes

Results

Increase the coordination and reach of school health-related activities in Alberta.

- Engaged 920 school communities as member schools
- Reached 3,216 participants through Professional Learning Opportunities
- Communicated with all 61 school jurisdictions in the province
- Collaborated with 70 municipal, provincial and national partners to support school wellness
- Participated in partner meetings with Government of Alberta, Alberta Health Services and Alberta Healthy School Community Wellness Fund to create a provincial three year Healthy Schools Action Plan

Increase preparedness of school communities to bring *Inspiring Education* to life.

- Developed and distributed 22 different resources that support wellness and cross-curricular competencies

Facilitate increased communication and collaboration between school communities.

- Two-thirds of participants attested to forming new partnerships as a result of attending the annual conference, Shaping the Future
- Five months after Shaping the Future, 80% of delegates used knowledge gained at the conference in their current roles
- Prototyped an online Hub for school communities to connect and access support for comprehensive school health. The tool was pilot tested with 27 school teams
- Shared local success stories provincially via the *Healthy Schools Alberta* magazine, distributed to all schools in Alberta

2014-15 Key Activities and Results Continued

Intended Outcomes

Results

Demonstrate improved health behaviours in target populations continued.

- 64% of schools made changes to the physical activity participation in their school three months after attending Healthy Active School Symposium
- 44% of schools made changes to the healthy eating practices at their school three months after attending Healthy Active School Symposium
- 62% of schools made changes that impacted the positive social environment of their school three months after attending Healthy Active School Symposium

Increase the self-efficacy of school community leaders to address comprehensive school health priorities.

- Provided 145 learning opportunities to school stakeholders
- 64% of participants changed their teaching practice to better address health and wellness in their school community after attending an Ever Active Schools professional learning opportunity

Collaborative Partnerships

From the perspective of Ever Active Schools, there are two facets to collaborative partnerships: those we engage in to advance work in healthy school communities, and those we facilitate among and between sectors.

In 2014-15, the Ever Active Schools team identified 70 distinct partners with whom we engage from health, education, recreation/active living and 'other' sectors. Sixteen of these were new partners, yielding a growth rate of 39%. The majority of new partnerships were established with other sectors, notably the private, social and Innovations and Advanced Education sectors. Intentional engagement of alternative sectors to advance school health builds local capacity to implement and sustain change.

Relationships improved

A unique partnership with the Alberta Medical Association, which supports schools to offer youth run clubs, engaged 55 Alberta schools that previously had no contact with Ever Active Schools or other provincially funded school health initiatives. This project was a gateway to promote comprehensive school health more broadly in school communities and engage the medical community in health promotion practices.

Resources leveraged

A project in Kainai Board of Education resulted in the creation of a Wellness Coordinator position to sustain First Nations wellness initiatives in their schools.

Healthy school policy developed

A partnership with the Alberta Schools' Athletics Association brought changes to the criteria for hosting school sporting events, where host committees must identify how they will align with the Alberta Nutrition Guidelines for Children and Youth and address healthy eating within their school community.

Changes made to environments

Partnering with local committees to host 12 Healthy Active School Symposia  267 school communities around the province, resulted in 257 healthy schools action plans that addressed healthy eating, active living and positive social environments.

Ever Active Schools is a hub for school health in Alberta.

Activities enable connections between school community stakeholders, organizations and community partners to strengthen health and wellness in schools and increase sustainability of comprehensive school health at the local level. In 2014-15, the majority of partnerships identified were facilitated between the education and health sectors, between education and recreation/active living sectors and within the education sector (partnerships between schools and/or jurisdictions). While education is rightly at the core of partnerships we facilitate, this analysis also highlights potential gaps and opportunities for the future. Partnerships between health, recreation/active living and other sectors (such as private, social and post-secondary) could be valuable ways to extend the reach of comprehensive school health work and improve the capacity of these partners to support it. Participation on inter-sectoral committees also allows Ever Active Schools an avenue to facilitate partnerships. Collectively, Ever Active Schools staff engaged in 62 committees in this reporting period, compared to the 49 reported last year. See a full listing in Appendix B: Ever Active Schools Provincial Engagement 2014-15.

Key activities Ever Active Schools employs to facilitate partnerships:

- Hosting the annual Shaping the Future conference
- Implementing innovative project based learning opportunities
- Hosting 12 Healthy Active School Symposia around the province
- Maintaining a website as a central communication tool

Support Wellness Education and Comprehensive School Health

Ever Active Schools supports school communities with tools for wellness education and with leadership for the comprehensive school health approach. Activities support schools in all steps of developing a healthy school community. Ever Active Schools' activities include:

- Developing and distributing resources
- Promoting and assisting schools with the Joint Consortium for School Health Healthy School Planner
- Supporting schools with the development and implementation of action planning.

Ever Active Schools Membership

- Under the current membership program, members receive recognition, event support, opportunities to participate in special projects and events, connections with other member schools and member rates for workshops and professional learning opportunities
- Increase of member and associate member participation to 920 schools
- The Healthy Schools Hub is a virtual platform where school teams can walk through the comprehensive school health approach, track progress and shares successes and access customized support. In 2014-15, Ever Active Schools prototyped this tool with 27 school health teams.

Ever Active Schools'
School Health Reach Through Membership

Resource Development and Distribution

Developing and distributing resources offers a tangible support for school communities. Historically, our resources have been directed at teachers in classrooms as a means to promote uptake in the priority areas of healthy eating, active living and positive wellbeing. However, the increasing importance to provide supportive resources for wellness education and the comprehensive school health approach that are interdisciplinary and competency-focused has strongly shaped resource development this year.

Resources Distributed by Type

6,965

Total number of Ever Active Schools resources distributed including: Daily Physical Activity Bins, Recipe Card Lesson Plans, Safety Guidelines, Move and Play Cards, Snack and Activity Bites, Daily Physical Activity Greatest Hits, AMA Youth Run Club Resources, Videos, Information Briefs

Number of different Ever Active Schools resources available to school communities

9

Number of resources developed this reporting period

50%

Number of Ever Active School Resources directly promoted CSH and cross-curricular competencies.

Assess, Plan, Implement, Evaluate and Celebrate

Supporting school communities through the change process of assessment, planning, implementation, evaluation and celebration is essential. In recent years, organizations that promote school health in Alberta have made great progress to consolidate efforts in this area. Notably, 2014-15 marked the first year of consistent use of the Joint Consortium for School Health, Healthy School Planner, a validated assessment tool offering a gateway to the change process for some and a more intensive perspective into school health for others. This collaboration has resulted in 652

school communities using the foundational module since its release, about 1/3 of all Alberta school communities. Use of the specialty modules has also increased over the last year.

Additionally, Ever Active Schools worked to develop a web portal as an online tool to support the change process more thoroughly. It is designed as a platform for teams of school health champions to connect with several unique features including:

- A means to share within and across

school teams and school jurisdictions

- Guidance through all stages of the process including assessment, planning, implementation of action plans and evaluation
- Integration of the Joint Consortium of School Health, Healthy School Planner as the assessment tool.

The online CSH portal, the Healthy Schools Hub, was prototyped and tested with 27 school health teams this reporting period.

652

School communities used

School Health, Healthy
School Planner

Communication and Knowledge Exchange

Communication to School Communities

Ever Active Schools disseminates information and facilitates conversations about wellness in school communities. In 2014-15, Ever Active Schools continued to improve and enhance our reach to schools champions. Ever Active Schools accomplished this by focusing on a social media strategy and expanding contact lists to further engage school community leaders. Continuing to share good new stories from schools that are creating and sustaining healthy school communities, Ever Active Schools has shared messaging around the provincial work of wellness, student leadership initiatives and success stories from schools that have embedded comprehensive school health.

Evaluation Results:

- Email – 5,764 subscribers, an increase of 39% from last year
- *Healthy Schools Alberta* magazine - 2,025 Alberta school recipients
- Social media - 618 Facebook likes and 2,219 Twitter followers, up 64% from last year
- Ever Active Schools website:
 - 183,946 page views (number of pages that have been visited in 2013-14), up 32%
 - 54,277 visits (number of times that people visited the Ever Active Schools website, includes repeat visitors), up 35%
 - 32,235 unique visitors (number of visits to the site, not including repeat visitors), up 39%
- Media Coverage - public awareness of work around wellness in schools (see the table on page 18).

Healthy Schools Alberta

The first issue of *Healthy Schools Alberta* was printed in January 2014, and is distributed biannually. All publically-funded Alberta schools receive print copies of the magazine and an electronic version is posted online and shared through other communication channels. The magazine aims to be a catalyst for new school health ideas, promote government-funded initiatives, share successful strategies and increase knowledge of provincial school health supports. *Healthy Schools Alberta* is a colourful, easy-to-read communication tool, bringing Ever Active Schools' audience current information on comprehensive school health.

Key Successes:

An evaluation after the first issue of *Healthy Schools Alberta* showed:

- 100% of respondents found the content relevant to their roles
- 97% of respondents reported they would read the next issue.

Capacity Building Through Innovative Projects

In 2014-15, Ever Active Schools supported and led innovative projects to provide meaningful solutions that support improved health and learning outcomes for Alberta students.

The findings from the projects have the potential to be shared provincially and the opportunity for best practices to be scaled up to impact more school communities across Alberta.

Ever Active Schools was able to leverage additional funding of \$285,150 to support innovative, collaborative wellness projects that have resulted in increased capacity and better understanding of evidence based approaches to improved health in children and youth. Project-based work helped lay a foundation of wellness and has provided an understanding of the actions and strategies needed to impact change in complex learning environments.

The projects on the following pages involved collaborative partnerships, resulting in increased capacity to address health and learning outcomes in Alberta students. Full project reports available upon request.

Supporting First Nations, Métis and Inuit Communities through strength-based, resiliency-focused initiatives

Ever Active Schools has worked closely with Alberta First Nations, Métis and Inuit (FNMI) communities to build relationships, laying the foundation for the critical reduction of health and education disparities that currently exist. The capacity building work has a specific focus on an Indigenous medicine wheel concept of health called the Circle of Courage that was adopted by Dr. Martin Brokenleg. Preliminary findings suggest this intervention is effective for building capacity in preventing obesity, improving healthy living knowledge and self-efficacy.

Key Successes

- Since Ever Active Schools began working with Kainai Board of Education on a CSH approach in 2010, high school completion has increased from 1 to 19 students
- Kainai Board of Education committed \$100,000 to sustain wellness activities and hire a Wellness Coordinator
- A community consultation to address wellness in the Peigan Board of Education was held to involve teachers, students, community members and Elders in wellness
- Working with national and provincial initiatives, EAS has been a catalyst for innovative strength based initiatives and sharing of successful strategies.

In a span of five years,
high school graduation at
Kainai High School has

Alberta Medical Association Youth Run Club - In Partnership with the Alberta Medical Association, the Running Room and Alberta Physiotherapy

As a partner with the Alberta Medical Association (AMA) and other key stakeholders, Ever Active Schools has spearheaded a youth run club program in Alberta to tackle the decreasing levels of physical activity levels among school-aged children. The initiative primarily aims to educate children about the importance of leading a physically active and healthy lifestyle while giving them an opportunity to be critical thinkers in their own personal growth and well-being. The goal is to instill the importance of regular physical activity in children so they form habits that become part of their everyday lives as adults. The initiative has also been a gateway for schools to address a broader approach to wellness within their school community.

Key Successes

- 305 schools participated in AMA Youth Run Clubs across Alberta
- 18,000 students participated in the AMA Youth Run Club
- 430 teachers and community members supporting the initiative
- 67% of student participants felt more connected to classmates
- 77% felt less stressed
- 86% felt supported to make healthy choices
- 95% will keep running
- 82% of participants reported that they were not traditionally physically active
- 19 additional minutes of moderate to vigorous physical activity for Youth Run Club participants as compared to the provincial average.

“All food and beverages sold and provided at Alberta Schools’ Athletic Association provincial championship events held in Alberta Schools’ Athletic Association member school facilities must fit within the “choose most often” and “choose sometimes” categories of the Alberta Nutritional Guidelines for Children and Youth, details of which can be found on the Alberta Schools’ Athletic Association website.”

- Policy passed May 7, 2015

Healthy Eating at School Sporting Events - In Partnership with the Alberta Schools Athletics Association

In partnership with the Alberta Schools’ Athletics Association, Ever Active Schools continued to support healthy eating initiatives at school sporting events in Alberta in the third year of this project. Year one utilized focus groups and input from 573 coaches, teachers and athletic directors to identify barriers to healthy eating within their school community and events. In year two, tools were developed to support schools through the barriers. In 2014-15, an electronic toolkit was tested with pilot schools and policy was developed. Additionally, the project serves a connecting point for school district nutrition policies and action in the after school time period.

Key Successes

- The toolkit was tested for implementation at four events. Lessons were developed into shareable success stories
- A healthy school policy was passed by the Alberta Schools’ Athletic Association board that requires Provincial Championship hosts to serve healthy foods
- A campaign to bring awareness and successful implementation to the new policy was initiated. The campaign is entitled “Appetite for Change.”

After School Hours – Healthy Hearts Initiative In Partnership with the Public Health Agency of Canada

Year two of this project worked to scale up the successes from the first year with provision of resources to expand after school support in Slave Lake and provide learning opportunities for other communities through a pre-conference event at Shaping the Future.

Key Successes

- Sustained after school time period programming in five communities across Alberta
- Developed key partnerships to advance sharing of resources and development of a community of practice
- Hosted three webinars focused on the afterschool time period with 76 people attending.

Competency Focused Learning Opportunities

Healthy Active School Symposia

Ever Active Schools led school health partners in 12 Healthy Alberta School Symposia events across the province, involving 267 schools from 55 jurisdictions with 2,237 student and adult participants. The events focused on building competencies that support students in building student leadership and addressing health and learning outcomes.

The competency focused learning opportunities for students empowered students to develop communication skills, provided opportunities to think critically about their role as school health champions and allowed them to experience interaction with others while working cooperatively with their school wellness team.

Evaluation practices this year allowed Ever Active Schools to assess the changes in practice that occur following the 12 Healthy Active School Symposia events. Participants were asked to complete evaluations immediately following the event, and then again one and three months afterward. The findings showed sustained impact from the event and successful implementation of action plans. Evidence of the sustained impact of the events are within the full report included as Appendix E.

“I appreciate the effort made to have so many schools gather and make an impact on my worldview.”

Student comment on the HASS event

“Love the opportunity to get to know and connect with students outside of a typical school environment. Student focused!”

Teacher comment on the HASS event

Students playing games in the gymnasium at the Red Deer Healthy Active School Symposium.

Key Successes

- 92% of adolescent student participants felt that the Healthy Active School Symposia taught them how to be a leader three months following the event
- 257 Healthy School Action plans were developed with student input at the 2014-15 Healthy Active School Symposia events
- 94% of adolescent participants reported that the Healthy Active School Symposia helped them to develop a useful Healthy School Action Plan and 94% identified that they had the confidence to implement it
- 72% of schools had begun planning new healthy eating activities and 44% report changes to eating habits at their school three months after the Healthy Active School Symposia
- 83% of schools had begun planning new physical activity initiatives and 64% reported changes to physical activity participation at their school three months after the Healthy Active School Symposia
- 66% of schools had begun planning to support a positive social environment and 62% reported changes to a positive social environment at the school three months after the Healthy Active School Symposia.

Policy development	12%	11%	Most commonly nutrition/healthy eating policy changes

Provincial School Health Conference: Shaping the Future

Ever Active Schools hosted the annual Shaping the Future – Inspiring children and youth to be healthy learners conference, which brings together leaders from the health, education and active living sectors.

Evaluation Results:

Shaping the Future brought together professionals from different sectors to engage in learning opportunities that support the implementation of comprehensive school health strategies:

- 497 delegates attended, more than double the attendance from the first conference and representing a growth of 20% from the previous year
- Of the 497 delegates in attendance, 78% were from education, 12% from health and 5% from active living and recreation, 3% from post-secondary and 2% from research.
- There was representation from all 61 Alberta school jurisdiction
- Five months after the conference:
 - 63% of the Shaping the Future participants attested to forming new partnerships as a result of attending
 - 87% of participants used knowledge gained at the conference to a moderate to great extent
 - 79% of participants reported a change in practice as a result of attending the conference
- Find the full report in Appendix C.

Increase in Shaping the Future Delegates

“I found Shaping the Future to be a hub of health and wellness action in the province. If you wish to have an impact on school wellness, the Shaping the Future conference is the place to be.”

Physical Literacy Summit

The Physical Literacy Summit was a catalyst to educate, engage and ultimately embed quality physical literacy experiences in a school and community setting. It involved collaborative work around physical literacy and highlighted Active Alberta stories from across the province and beyond. The event aimed to move individuals and organizations from discussion to a common understanding and action.

It brought together the sectors of education, health, sport, and recreation, including teachers, administrators, coaches, recreation leaders, parents, PLAY groups, attendees of the Physical Literacy Summer Institute, sport organizations and anyone interested in meaningful participation in development of a healthy active population.

Key Successes

- 96% of participants found the information presented at the Summit useful to their current role or position
- 92% indicated an increased understanding of provincial and national supports for physical literacy
- 90% of delegates attended to increase their self-efficacy around physical literacy
- 70% of delegates requested the event to be held annually to build partnerships and increase understanding of physical literacy.

Professional Learning Opportunities

Ever Active Schools’ learning opportunities are made available to school communities across the province and support a comprehensive school health approach, cross-curricular well-being, student leadership, support of the Daily Physical Activity policy and staff wellness. Learning opportunities provided to participants address the needs of school communities today and help prepare schools for the “education system of tomorrow.” Find the brochure of learning opportunities offered in Appendix E.

64% of school community leaders said that learning opportunities provided by Ever Active Schools had changed teaching practices and had an impact on student learning.
